

OASIS SWING RAMP

Aluminum Ramp to Oasis swing for wheel chair and rollator users. In summer 2020 a stop boom (dark grey part at the end of the floor) was added to the Ramp delivery to be installed to the opposite side of the swing floor to prevent wheel chair or rollator to slip down from the floor. You can also use two ramps on the swing so the passage takes place on both directions and the stop boom is not used.
