

Dex step can be used for foot placement drills, landings and take offs using one or two feet. The small inclined surface provides chance for crane landings and creates unified look and feel with the other equipment in Dash Parkour. Dex step is made of galvanized steel tube structure and it's ready to be installed without assembling. Watch a wide selection of parkour techniques performed on Dash Parkour equipment. The playlist showcases how the products can be used in versatile ways: Watch the videos here.
