Dex Beam

Dex Beam is a steel balancing beam with a sunken look. It's a place for easy balancing challenges, landing drills as well as take offs and foot placement exercises. Dex Beam can be used to connect functions with other equipment or connect two other equipment to create obstacle courses (for example ones that can be completed without touching the ground). Dex Beam is made of galvanized steel tube structure and it`s ready to be installed without assembling. Watch a wide selection of parkour techniques performed on Dash Parkour equipment. The playlist showcases how the products can be used in versatile ways: Watch the videos here.

Product length, mm	2210
Product width, mm	910
Product height, mm	270
Falling space, m²	16.3
Height required, mm	2370
Max. free fall height, mm	270
Safety info	EN 16899 TÜV
Foundation options	deep_mounting surface_mounting
Metal
