

# Base Frame

The Base Frame is built from straight elements to bring variety in Dash parkour product line. Base Frame's main functions are wall runs, cat landing, swinging and even underbars thanks to four rails placed carefully in the correct spots (two in the both sides of the back wall, one int the front and one in the ceiling). The surfacing of the vertical walls have perfect friction for the wall techniques. The colours of the graphic elements in the inner walls are derived from the mural in the same area. This creates the unified and unique look that inspires to move. Watch a wide selection of parkour techniques performed on Dash Parkour equipment. The playlist showcases how the products can be used in versatile ways: Watch the videos here.

Product length, mm	2445
Product width, mm	745
Product height, mm	1910
Impact area, m <sup>2</sup>	21.9
Falling space, m <sup>2</sup>	21.9
Height required, mm	4310
Max. free fall height, mm	1910
Safety info	EN 16899 TÜV
Foundation options	deep_mounting surface_mounting
