

Block M has FOUR different sides that can be used in training. Block M is higher than in block S making it more suitable for youth and adults and offer higher jumps and even wall runs. All four sides have different angles towards the ground level. Block elements are super valuable when placed in the middle of other products as you can approach them from basically any direction and always get a good grip thanks to the inclined anti-slip surface.

Product length, mm	2160
Product width, mm	2110
Product height, mm	1740
Falling space, m²	24.4
Height required, mm	3840
Max. free fall height, mm	1740
Safety info	EN 16899 TÜV
Foundation options	deep_mounting surface_mounting
