Tino is a playground product for small children with a steps to a low (570 mm high) platform and a slide. By the side of the platform there is a small tabletop for playing on. One face of the tabletop has a car racing track and the other a play stove. The visible face must be chosen on installation, but the tabletop can easily be flipped over at a later stage. The tabletop is strong enough for an adult to sit on, to assist a toddler on the slide. Bigger kids can climb to a higher (870 mm) tower using a net or a ramp to play with the track play panel. Beneath the tower there is a hut with a seat and a sea play panel.

User age	1+
