Lucas is an fun playground equipment that will develop especially children's strength, sense of balance and spatial perception. Climbing is very important for motor and muscle development, even for small children. This product is dimensioned to make climbing safe. Kids can safely climb to the tower, using the climbing net, and slide down via plastic slide. On one side of the tower there are trapeze rings, a trapeze bar and an abacus play panel. In the tower there is a track play panel and a roulette play panel. Beneath the tower there are two walls with round windows to increase the play area and allow for even more simultaneous users.

User age	3+
Number of users	16
Product length, mm	4560
Product width, mm	3300
Product height, mm	1690
Impact area, m <sup>2</sup>	37.9
Height required, mm	2670
Max. free fall height, mm	1000
Safety info	EN 1176-1, 3 TÜV
Installation time (for 1), H	12
Foundation options	deep_mounting surface_mounting
Wood	
Metal	
Colour of walls and HPL
