

Sofia is a traditional sandbox that is made extra special by two 570 mm high tables and a handy toy box. One face of the tabletop has a car-racing track and the other a play stove. The visible face must be chosen on installation, but the tabletop can easily be flipped over at a later stage. The sides of the sandbox are topped with high pressure laminate to prolong the lifetime but also to work as a seat for adults. Sandbox play particularly develops a child's sense of balance and spatial perception.
