Multifunctional tower play with two towers and a climbing frame. The +1970 mm tower can be accessed by a climbing wall with holes, and the exhilarating descent at high speed is via the slide or a fireman's pole. There is a fun suspension bridge for safe passage between the towers. Beneath the towers there are four seats for having a rest when necessary. Thanks to its many options, it can accommodate several children at a time. The frame top is made of laminate and pine.
