

	Bridges 2
	Climbing 6
	Roofs 2
	Slides 1
	Towers 4

A motoric workout offering a variety of climbing and balancing options. This workout offers a circular path that can be traversed. Two of the towers are located at a height of 1970mm, and two at 1470mm. Access to the towers is via curved ladders, up a climbing wall with holes, or up a climbing net. Children can descend the towers using a long slide or a fireman's pole. One tower can be accessed from the other by balancing on a rung bridge, by using the monkey bars, or by climbing across the climbing nets. The motoric workout can accommodate a large number of children, making it highly suitable for schoolyards and similar locations. Balancing develops especially balance and body control. The frame top is made of laminate and pine. When the product is placed in a kindergarten yard, please consider adding a safety bridge (701625SP) under the step bridge crossing.
