

Communication Spot

Communication spot enables conversation through images. It is an important everyday support for a child who does not speak or has difficulty producing or understanding speech. The product is useful for interaction and coordination support for all children. Children who have been given an equal opportunity to communicate outdoors are also calmer and less frustrated. With the help of Communication spot, it is easy to communicate, for example, what will be done next, or when it is your turn. Children and families who are learning a new language can also benefit from pictograms. The product contains one pictogram board in the language of your choice. Please indicate your language choice when ordering the product. Learn more about the product on the Materials and Colours tab.
