This adorable Little Hut is designed for children and is perfect for all types of games. The hut is open on one side, with two walls with windows, and a fence on the other three sides. The Little Hut is fun as a self-standing feature, as a group of Little Huts, or together with other Troll Village buildings. You can furnish it yourself or let children use their imagination with its interiors. Green window frames give a welcoming, bright accent of colour. A chimney crowns the playful design. This product does not require impact attenuating surfacing.
