Atacama sand lounge

This lovely sand play and deck solution of the Flora series is a true paradise for the little ones! The stairs and decks around the sandpit can be used for different play purposes or even small stages! They also help to return any spread sand back to the players. The integrated plant boxes can be utilized in many ways, for traditional plantings or perhaps for creating mini-gardens in a kindergarten yard. The beautiful shelter provides protection from rain and sunshine. Thanks to the modular structure, the product can also be customised according to your wishes by our MyDesign service.

User age	1+
Product length, mm	5520
Product width, mm	5920
Product height, mm	2550
