Balancing
*1*

# 175591M
# Giant's comb

The Giant's comb is a balancing track which can be placed on a trail in many ways, having the starting point either on the lower or the taller end. This kind of equipment is ideal for school yards for exercise and motor skills improvement, but also as a substitute of traditional seating. Whilst the equipment invites to sit, it promotes "exercise in disguise" whilst hanging out with friends.The Giant's comb is over three metres long balancing track with a wave shaped, ascending beam with ten branches, supported by a post at both ends. The taller post has three "branches" and the lower one two. The product is manufactured from locally sourced nordic pine. Looking for a Nordic Swan Ecolabelled product? This product is available with the Nordic Swan Ecolabel (item no. SL175591) in Nature Tone with deep mounting. Contact us and we'll be happy to tell you more!
