Plutonium has an incredible number of functions for kids of various ages. Thanks to its many options, it can accommodate several children at a time. The fact that it is organised in the form of routes provides exercise during play and fosters the players' development in many ways. Even social skills will develop almost unwittingly in such a large apparatus. The lower slide is suitable for younger kids, while older ones will be fascinated by the various climbing sections. Access to the 870 mm high slide is safe via steps. The higher (1,470 mm) tower can be accessed by ladder, a leaning peg ladder or one of two climbing walls. These options provide challenges for climbers of different levels. Descent is via a slide or a fireman's pole.

User age	1+
Number of users	18
Product length, mm	8150
Product width, mm	5190
Product height, mm	2920
Impact area, m ²	64
Falling space, m ²	66
Height required, mm	3270
Max. free fall height, mm	2250
Safety info	EN 1176-1, 3 TÜV
Installation time (for 1), H	32
Foundation options	deep_mounting surface_mounting
Metal	
Colour of walls and HPL	
Ropes
