

Sutu grid boarding fence L

Lappset Sutü grid boarding fence L, size 7,95 x 2,8 m (26' 1" x 9' 2 1/4") (width x height). The fence is only available in deep mount. As with any play and sports area, the proper location and surface are essential for success. For the Lappset Sutü, likewise, adding a boarding fence is necessary because you want to keep fast gameplay to overcome retrieving the ball at every missed shot. Therefore, our fence and boarding systems are designed so that all components are flush with the Sutü. The ball returns the way you expect it to return because there are no overhead structural parts for the ball to bounce off. In addition, the low boarding is wide at the top, so you can sit on it when you take a break from playing a game. On the Plaza variants, the corners of the field are angled 45 degrees to stimulate fast and active play, as the boarding can be tactically used for clever passes.
