

Toro Grid boarding L, without entrance

Lappset Toro Grid boarding L, size 13 x 13 m (42' 7 3/4" x 42' 7 3/4") (width x length). In this variant, the boarding is entirely closed to maximise the gameplay. To enter the arena, users have to climb the boarding. When an entrance is preferred, please check the variants that offer an offset entrance for easy access for everyone. The Toro is a fast-paced game, and adding the proper boarding are essential for active gameplay. Therefore, our boarding systems are designed such that all components are flush with the Toro goals. The ball returns the way you expect it to return because there are no overhead structural parts for the ball to bounce off. Besides, the corners are angled 45° to stimulate fast and active gameplay, as the boarding can be tactically used for passes. In addition, the boarding is designed as a seating and spectator element to chill on after a game and for cheering other players. Most bolts are hidden to raise the aesthetics of the boarding. Overall, it's a unique and clever modular design and is easy to install.
