

DROPZONE ELEVATOR

This fun elevator called Drop Zone only takes the passenger down! It is globally patented and available only through Lappset. This is a unique addition when you want dynamic movement in the playground equipment. As the child steps onto the platform, the bar smoothly descends and automatically rises when the child leaves the platform. The downward motion fascinates both younger and older players and inspires them to move and climb up again and again. Drop Zone is intended for one user, but depending on the player's age and size, even three can safely fit in.
