

JUNIOR TOOLS activity panel

Ready for role play! This tool set is meant for a carpenter's workshop or a garage. The lower height of this play panel allows better interaction for younger or smaller players. The Junior tools play panel boosts creativity and encourage children to learn problem solving and social skills. Play panels improve proprioception, tactile and visual senses as well as eye-hand coordination and fine motor skills. The play panel is available in eight different colours. It can be installed to be used from the ground level only.
