

Kita litter bin is a truly garbage eater as it has aperture size almost the same as it's total width. The new designed top gives excellent cover against rain and snow as well as it prevents birds getting into the bin. Large aperture is of course user friendly but also maintenance is ergonomic through openable front door and the steel liner gives safety and tidiness. Kita is made in two sizes, 60 and 100, and material is 2mm galvanized and powder coated steel. There is a wide range of fixing accessories to choose Design: Muodon vuoksi Oy Heikki Meriläinen.
