

BOTTLE RECYCLING TUBE FOR LITTER BINS

Bottle tube is an optional recycling container attached to the side of CT and Kita litter bins. It is a temporary storage for recyclable glass, plastic and aluminum bottles/cans which would be otherwise thrown into garbage. From the Bottle recycling tube it is easy to pick up the bottles and cans which then can be delivered to recycling points. Standard colors are the same as in litter bins; grey RAL7024 and green RAL6012.
