Forest House (NA175582M) complies with the ASTM and CSA standards. This exciting Forest House is designed for children and is perfect for all types of games. The hut has enough space for several toddlers at once. The Forest House is fun as a self-standing feature or together with other Troll Village buildings. The hut can be fitted with additional features so that children can use it for their role play and other games. One of the two long sides of the hut is entirely open. The boarded walls have windows for easy supervision children at play. The hut is open on one side and has three boarded walls with windows and a fence on one side. Green window frames give a bright accent of colour.

Product length, mm	2000
Product width, mm	980
Product height, mm	1940
Height required, mm	2940
Safety info	ASTM F1487, CSA Z614
Installation time (for 1), H	2
Foundation options	deep_mounting surface_mounting
