

Sona Interactive dance and play arch

The Lappset Sona Interactive dance and play arch is a 3.8-meter high interactive structure designed for outdoor use (but can also be used indoors). It features motion detection camera and audio speakers that provide instructions for the play floor below. No sensors are present on the play floor to avoid wear and tear. The product is equipped with a wireless internet connection for updates and customer settings can be adjusted using the online My Yalp platform. The Sona offers an engaging outdoor experience while being versatile enough for indoor use.
