

# INTERACTIVE SPORT GOAL

The Lappset Toro is a versatile interactive sports arena, measuring approximately 13.2x13.2 meters, with four goals. Each goal features impact-sensitive panels made of polycarbonate with embedded electronics, which measure and react to ball impact. These goals are connected and controlled through a central game console. Vibrant LED lights and audio speakers provide players with feedback and encouragement. The product also has a wireless internet connection for updates, product monitoring, and the ability for customers to adjust settings through the online My Yalp platform. The Toro is designed specifically for outdoor use but can also be used indoors. Wooden arena is available in different sizes with product numbers Q13755, Q13756, Q13757 and Q13758.
